I had gestational diabetes (0=no, 4=yes)	0	1	2	3	4
I get regular episodes of low blood sugar (eg., shakiness, nervousness, irritability, light headed, cloudy thinking) that improves with eating	0	1	2	3	4
I regularly drink alcohol	0	1	2	3	4
I get little to no exercise (0=exercise regularly, 4=never exercise)	0	1	2	3	4
I am unable to lose weight even while exercising regularly, controlling food cravings and following a low-calorie diet	0	1	2	3	4

Overall Score = _____

10 or less = Satisfactory

11-20 = Possibly insulin resistant

21 or more = Probably insulin resistant

Insulin resistance and set the stage up for a HUGE host of chronic diseases, including type II diabetes, obesity, adrenal fatigue, and cardiovascular disease and metabolic syndrome. It is best to get your fasting blood sugar assessed and regulated into its "optimal" zone by following the **cardiovascular health solutions in the "Top 10 Lab Tests and Solutions."**
